

DGT-Energy Whitepaper (v1.0)

Institutional-Grade Utility Token Protocol for Energy-Linked Real-World Asset Participation

1. Company Identity

- **Company**: De Goat Capital – Web3-native venture builder focused on real-world energy assets.
- **Token**: DGT-Energy (DGTEnergy) — multichain utility token.
- **Mission**: Bridge global crypto capital with real-world energy ecosystems.
- **Vision**: Be the most trusted multichain gateway for energy-linked utility participation.
- **Values**: Transparency, Utility over speculation, Emerging market focus, Long-term alignment, Tech + Trust.

2. Core Business Model

- **Capital Raising**: Structured sales (Seed → Progressive Rounds), unsold tokens locked in treasury.
- **Capital Deployment**: 100% of raised capital allocated to real-world energy receivables & projects.
- **Utility-Linked Rewards**: Optional staking, discretionary USDT rewards linked to performance.
- **DAO Structure**: Hybrid — core team + multisig treasury, progressively decentralized.
- **Strategic Objective**: On-chain access to high-impact energy operations for decarbonization & inclusion.

3. Tokenomics

- **Identity**: ERC-20 / BEP-20 / SPL, multichain (Ethereum, BNB, Polygon, Solana).
- **Supply**: 1,000,000,000 DGT, fully minted at genesis, no burn/mint.
- **Seed Round**: 11,111,111 DGT at 0.036 USDT = 400k USDT.
- **Progressive Sale**: Step-up pricing, unsold tokens locked.
- **Utility**: Staking, governance (Snapshot), token-gated dashboards.
- **Allocation**: 100% of capital deployed into verified energy receivables.
- **Transparency**: On-chain treasury, audits, governance-based releases.

4. Digital Product (Landing DApp)

- **Homepage**: Mission & utility overview.
- **Dashboard**: Treasury, capital deployment, impact metrics.
- **Token Sale**: Seed & progressive rounds.
- **Governance**: Proposals, voting, Snapshot integration.

- **Wallets**: MetaMask, WalletConnect, Trust Wallet, Coinbase.
- **Features**: Staking dashboard, P2P platform, real-time reporting.

5. Governance Framework

- **DAO Model**: Hybrid progressive decentralization.
- **Voting**: One-token-one-vote via Snapshot.
- **Treasury**: Hybrid multisig + DAO oversight.
- **Proposal Lifecycle**: Forum → Draft → Vote (5 days) → Execution.

6. Risk Management & Security

- **Audits**: Third-party, bug bounties.
- **Treasury**: Segregated reserves, solvency models, emergency pause.
- **Governance**: Quorums, delays, contributor reputation.
- **Legal**: Utility token, continuous compliance reviews.
- **Cybersecurity**: Serverless infra, rate limits, wallet protection.

7. Roadmap

- **Phase 0 (2025)**: Tokenomics, contracts, seed round.
- **Phase 1 (Q3 2025)**: DApp v1, staking, dashboard, DAO portal.
- **Phase 2 (Q4 2025–Q1 2026)**: Multichain, partnerships, yield dashboards.
- **Phase 3 (2026)**: Full DAO governance, APIs, advanced utilities.

8. Legal Structure & Disclaimers

- **Entity**: Operated by De Goat Capital in crypto-friendly jurisdiction.
- **Classification**: Utility token, not equity/debt.
- **Disclaimer**: Not investment advice, participation voluntary, subject to local laws.
- **Jurisdictional Restrictions**: Some countries may prohibit.
- **Legal Evolution**: Ongoing reviews, adaptive compliance.
